Product data sheet

Module model EW100

Article number: 19540895 - PU 1

Excavator, until everything fits

Brick by brick, the EW100 is taking shape. The mobile excavator is assembled, rotated, moved and repositioned time and time again. The boom and bucket can be adjusted so that the next building site can be set up straight away on the children's bedroom floor. A model that doesn't just stand still once it's been put together.
